②

The impact of examination malpractice

malpractice is the breach by a member of a profession of either a standard of care or a standard of conduct. Therefore examination malpractice is the breach by a member in the examination hall. Such negligence can lead to fear of failure to pass the examination or even lack of confidence in oneself. Another problem can even be improper guidance from teachers to face fears in examinations.

Another problem with examination malpractice are effects which can be loss of trust in the educational system which can be reduced enrollment of students in school, frequent cancellation of results which discourages students or candidates from studying hard.

Such effects can lead to expulsion from examination hall or even the school. Also cancellation of the performance in that subject and all other subjects the candidate has already appeared.

Solutions to such punishments are good school management, increment in the salaries of teachers e.t.c

In conclusion, Examination malpractice must be avoided at all costs so as the child may grow up to have no bad influence on others but rather, do a great job in the future and have a good influence on children in the later future.

- ① drug abuse frequently causes drug addiction.

English language. Summary writing

Paragraph 2

People often erroneously believe that only conventional drugs can be abused, not herbal medicine.

Paragraph 3

Some herbal medicines may be potentially toxic or cause adverse reactions either on their own or in combination with other conventional drugs.

Paragraph 4

Some herbal medicines have been found to contain potentially lethal concentrations of arsenic, mercury, lead.

Paragraph 5

Some herbal medical practitioners often mix herbal preparation with conventional drugs, presumably to make them more effective.
