Assignment

1 3 functions of lubricant

Answer

- i) They reduce friction between surfaces
- ii) They provide oil film on metal surfaces
- iii) They transmit forces and transport particles

2 Construct a trapezium of angle 75° using the following steps:

- Draw Parallel line $AB = 6\text{ cm}$
- Construct a given $\angle A = 75^\circ$ and draw line AC
- Draw the parallel $CD = 4.5\text{ cm}$
- Join D to B Solution to complete the trapezium
